Press Release

Perdac Ltd and Atomising Systems Ltd Announce their Next 2-Day Course on “Atomization for Metal Powders” following a Very Successful Course held in March 2011

Perdac Ltd Director **Andrew Yule** has announced the dates for the next presentation of the unique course on the technology, practice and economics of metal powder production by atomization: **1st and 2nd March 2012**. The course will be held at the Britannia Hotel in Central Manchester, England.

Professor Yule stated that he and **John Dunkley** (Atomising Systems Ltd Chairman and principal lecturer on the course) have yet again been impressed by the international popularity of the course, with registrants on the 2011 course from 4 continents: Europe, North America, South America and Africa..... “also we are continuing to attract specialists from both Industry and also Universities or Research Institutes, with typically 70% of registrants from the metal processing industry”.

John Dunkley comments: “...this year the course benefited for the first time from the well received lectures contributed by **Dirk Aderhold**, Technical Manager at Atomising Systems Ltd, in the areas of gas, rotary and ultrasonic atomization. We continue to refine and update the course each year, often using new information resulting from our personal experience.. ”.

The **course flyer and full information** can be obtained at www.perdac.com where registration on the course is also possible

Dateline: Sheffield and Manchester UK 10th September 2011
